

**Principal Functioning Agents/Active Ingredients:**

Yucca extracts .....	30.0 %
Garlic extracts .....	10.0 %
<b>Constituents ineffective as spray adjuvants:</b>	
Water .....	60.0 %
<b>Total</b>	<b>100.0%</b>

All ingredients are exempt from tolerance requirements under 40 CFR 180.1001, and 180.1164.

**CAUTION: Keep Out of Reach of Children. Liquid causes eye injury.** Avoid contact with skin, eyes or clothing (wear long sleeved shirt, long pants, shoes plus socks). Harmful if swallowed or absorbed through skin. Wash thoroughly with soap and water after handling.

**General Information**

ORGANIC BIOLINK<sup>®</sup> SURFACTANT & PENETRANT is a low foaming, non-ionic type spreader, adjuvant. ORGANIC BIOLINK<sup>®</sup> SURFACTANT & PENETRANT provides quick wetting, more uniform distribution, and increases retention of spray by reducing surface tension of the spray droplets. ORGANIC BIOLINK<sup>®</sup> SURFACTANT & PENETRANT is a water-soluble adjuvant that may also be used as an interfacing agent for wettable powders. Variations in conditions of use can cause some variation in the amount of ORGANIC BIOLINK<sup>®</sup> SURFACTANT & PENETRANT required. The minimum required to give a smooth, uniform coverage usually gives the most effective results.

**Directions For Use**

Some pesticides have stated adjuvant use rates. In all cases, the pesticide manufacturer's label should be consulted regarding specific adjuvant use recommendations and that rate followed. Do not add adjuvant at a level that would exceed 5% of the finished spray volume.

**Herbicides, Defoliant, Desiccants:** 1 to 4 pints/100 gallons of spray mixture.

**Insecticides, Fungicides, Acaricides, Plant Growth Regulators, Foliar Nutrients:** 1 to 4 pints/100 gallons of spray mixture.

**Turf, Ornamental and Industrial Spraying:** 1 to 3 ounces per 5 gallons of spray mixture.

**Note:** This product has demonstrated excellent plant safety; however, not all species and varieties have been tested. Before treating a large area, treat a small area and observe prior to full-scale application. Do not use on roses.

**Mixing Instructions**

Prior to pesticide application, clean mixing and application equipment according to pesticide label directions. Adjust spray tank pH to a maximum of 6.0 before adding ORGANIC BIOLINK<sup>®</sup> SURFACTANT & PENETRANT to the tank. For wettable powders and water-soluble materials, add ORGANIC BIOLINK<sup>®</sup> SURFACTANT & PENETRANT in water before adding pesticide to spray tank. For emulsifiable products, add ORGANIC BIOLINK<sup>®</sup> SURFACTANT & PENETRANT after a good emulsion is formed. Note: For optimum results, spray mixes containing ORGANIC BIOLINK<sup>®</sup> SURFACTANT & PENETRANT should be applied within 36 hours.
