

ST-12

Sewage Treatment

Product Information

ST-12 is a blend of organic nutrients designed for treatment of agricultural, municipal and industrial wastes under aerobic conditions. ST-12 increases microbial activity resulting in decreases in odors, in the overall strength of a waste stream (BOD) and in suspended solids.

When used in conjunction with oxidizing agents or microbial inoculants, ST-12 restores the proper environmental conditions (redox potential) to re-establish beneficial micro-flora and eliminate odors including ammonia and volatile organic compounds (VOCs).
